DIAMOND
DESIGN PRECAST, Inc.

QUALITY • STRENGTH • INTEGRITY

WE STAND BEHIND OUR PRODUCTS

PROTECT YOUR INVESTMENT.

SEALING YOUR PRECAST CONCRETE

WE SEAL FOR YOU — AT ADDITIONAL COST

Sealing helps protect your precast products from daily exposure to the elements so they stay beautiful and perform their best for years to come.

Concrete is naturally porous. Moisture, stains, salts, oil and other substances can penetrate the surface and cause discoloration or damage over time.

Sealing creates a protective barrier that helps guard against the elements and everyday wear—keeping your precast products looking their best.

FACTORY SEALED FOR YOUR CONVENIENCE

For your convenience, we offer professional sealing of your precast products at our plant for an additional cost. Let our team protect your investment before it even arrives on site.

THE BENEFITS OF SEALING

STAIN RESISTANCE
Helps repel dirt, oil, food, leaves and other substances that can cause permanent stains.

MOISTURE PROTECTION
Reduces absorption of water, helping prevent cracking, spalling and surface deterioration.

ENHANCED APPEARANCE
Maintains the rich color and finish of your precast products.

LONGER SERVICE LIFE
Minimizes damage from freeze–thaw cycles, de-icing salts and harsh weather.

EASIER MAINTENANCE
Sealed surfaces are easier to clean and require less time and effort.

SMART INVESTMENT
Sealing now can save you time, money and repairs —today and in the future.

PROFESSIONAL PROCESS. LASTING PROTECTION.

Our factory sealing is completed in a controlled environment using premium sealers and proven methods to ensure even coverage and optimal performance from day one.

PLEASE NOTE

- Sealers may slightly enhance color and give a subtle sheen.
- Sealer performance can vary based on climate, environment and maintenance.
- We recommend resealing every 2–3 years for continued protection.

ADD PROTECTION. ADD VALUE.

Factory sealing is available at an additional cost. Contact your Diamond Design Precast representative for pricing and details.
