WE STAND BEHIND OUR PRODUCTS

THE BENEFITS OF KARBON BAR®

STRONGER. LIGHTER. BETTER.

KARBON BAR® is a pultruded carbon fiber rebar that offers a high-performance alternative to traditional steel rebar. It delivers superior strength and durability while resisting corrosion for the life of the concrete.

CORROSION RESISTANT

KARBON BAR® will not rust or corrode, even in the harshest environments, extending the life of your concrete.

LIGHTWEIGHT & EASY TO HANDLE

Up to 75% lighter than steel rebar, making it easier to transport, cut and install—reducing labor time and improving safety.

HIGH STRENGTH & DURABILITY

Stronger than steel by weight, KARBON BAR® has an exceptional strength-to-weight ratio and long-term durability.

NON-CONDUCTIVE & NON-MAGNETIC

Ideal for projects where electrical conductivity and magnetic interference are concerns.

IDEAL FOR HARSH ENVIRONMENTS

Perfect for marine structures, bridges, parking garages, sewage treatment plants and other corrosive settings.

ADDED TO OUR CONCRETE MIX

KARBON BAR® is added to our concrete mix during production to provide built-in, long-lasting protection and performance. This ensures consistent quality and durability throughout the life of the concrete.

KARBON BAR®
REINFORCING THE FUTURE

WE STAND BEHIND OUR PRODUCTS

All of our products are backed by our commitment to quality, strength and integrity.
